Hello Alf

When doing a save search on ipad there is an option to mail reminders at the bottom of the window.
 One thing that I keep losing is the option to search worldwide.
 When doing a save or a modified search I lose those options when previous set via the web.
 screenshot of ipad,

The screenshot shows a 'Refine' search interface on an iPad. At the top, there are buttons for 'Cancel', 'Done', and 'clear all'. Below these are filters for 'Sort', 'Category', 'Description Search', and 'Search other countries' (which is highlighted in blue). The 'General' section includes 'Condition' (set to 'Any') and 'Watch Accessories & Spare Parts'. The 'Other Options' section includes 'Price Range' (set to 'Any'), 'Max Distance' (set to 'None'), 'Time Left' (set to 'No Limit'), 'Number of Bids' (set to 'No Limit'), 'Free postage' (set to 'OFF'), 'Description Search' (set to 'ON'), 'Search other countries' (set to 'ON'), 'Located in GB Only' (set to 'OFF'), 'Completed Listings' (set to 'OFF'), and 'Sold Items Only' (set to 'OFF').

When looking at the web version to searches,

☐ swaga (1603324,165.034,168034,169204,165.034,166.3324)			View items Edit search More actions
☐ swaga (1603324,165.034,168034,169204,165.034,166.3324), Located in: Worldwide	Jewellery & Watches, Location: Located in: Worldwide, Buying options: Search title and description	Receiving emails (see what's new)	View items Edit search More actions

The top one is the new one, none of the options set via the ipad are shown here.

Below is the screenshot of the mail alert option on the ipad,
